

# Zambia National Malaria Control Programme: Enumeration Activities District Summary Report

District: **Chilubi**  
Date of last enumeration **01-Aug-09**

|  | <i>2007</i> | <i>2008</i> | <i>2009</i> | <i>Total</i> |
|--|-------------|-------------|-------------|--------------|
| <b>Enumeration results: Demography</b>                           |             |             |             |              |
| Households (HHs)   |             |             | 12,679      | 12,679       |
| Structures enumerated  |             |             | 21,835      | 21,835       |
| Structures per HH enumerated                                     |             |             | 1.7         |              |
| Sleeping spaces  |             |             | 23,812      | 23,812       |
| Sleeping spaces per HH enumerated                                |             |             | 1.9         |              |
| Houses with no respondents                                       |             |             | 4,059       | 4,059        |
| Houses with no structure/room count                              |             |             | 109         | 109          |
| Percent of HHs enumerated (%)                                    |             |             | 0.9         |              |
| Total population   |             |             | 45,661      | 45,661       |
| Children under age five  |             |             | 10,977      | 10,977       |
| Average population per HH  |             |             | 3.6         |              |
| <b>Enumeration results: Mosquito nets</b>                        |             |             |             |              |
| Mosquito nets reported   |             |             | 10,693      | 10,693       |
| Mosquito nets per HH   |             |             | 0.8         |              |
| Mosquito nets per sleeping space                                 |             |             | 0.4         |              |
| Percent of HHs with at least 1 net (%)                           |             |             | 82.4        |              |
| <b>Enumeration results: Indoor residual spraying (IRS)</b>       |             |             |             |              |
| Rooms enumerated   |             |             | 32,794      | 32,794       |
| Rooms with plastered surfaces                                    |             |             | 1,193       | 1,193        |
| Households sprayed < 12 months                                   |             |             | 3,821       | 3,821        |
| Percent HHs sprayed < 12 months (%)                              |             |             | 44.3        |              |
| Average numbers months ago HH sprayed                            |             |             | 8.4         |              |
| <b>Enumeration results: Household received IEC materials</b>     |             |             |             |              |
| Percent HHs receiving IRS brochure (%)                           |             |             | 18.4        |              |
| Percent HHs receiving ITN brochure (%)                           |             |             | 17.9        |              |
| <b>Enumeration results: Community health worker (CHW) visits</b> |             |             |             |              |
| CHW Visit  |             |             | 862         | 862          |
| Percent HHs reporting visits by CHW (%)                          |             |             | 10.0        |              |

Figure 1: Household enumeration activities by mosquito net availability

Green dots = households with nets  
Pink dots = households with no net

Figure 2: Household enumeration activities by plastered wall surfaces

Yellow dots = households with any plastered wall surfaces  
Purple dots = households with no plastered wall surfaces

Figure 3: Households enumeration reported sprayed in the previous 12 months

Blue dots = houses reported sprayed within the previous 12 months

## Indicator definitions

---

### *Enumeration results: Demography*

#### **Households (HHs)**

The total number of enumerated households.

#### **Structures enumerated**

The total number of structures reported for each household.

#### **Structures per HH enumerated**

The average number of structures enumerated per household.

#### **Sleeping spaces**

The total number of sleeping spaces reported by the household respondents.

#### **Sleeping spaces per HH enumerated**

The average number of sleeping spaces structures enumerated per household.

#### **Houses with no respondents**

The total number of households with no respondent or where no information on number of people living in the household was available.

#### **Houses with no structure/room count**

The total number of households with no information on number of structures or rooms available.

#### **Percent of HHs enumerated (%)**

The percentage of total number of households with no information on number of structures or rooms available. The denominator is the total number of enumerated households.

#### **Total population**

The total population reported among households with a respondent.

#### **Children under age five**

The total number of children under five reported living in the household among households with a respondent.

#### **Average population per HH**

The average population per household among households with a respondent.

### *Enumeration results: Mosquito nets*

#### **Mosquito nets reported**

The total number of mosquito nets reported available in households with a respondent.

#### **Mosquito nets per HH**

The average number of mosquito nets per household among households with a respondent.

#### **Mosquito nets per sleeping space**

The average number of mosquito nets available per sleeping space among households with a respondent.

### **Percent of HHs with at least 1 net (%)**

The percentage of households with at least one mosquito net among households with a respondent.

#### *Enumeration results: Indoor residual spraying (IRS)*

##### **Rooms enumerated**

The total number of rooms reported for each household.

##### **Rooms with plastered surfaces**

The total number of rooms with plastered wall surfaces reported for each household.

##### **Households sprayed < 12 months**

The total number of households reported to have been sprayed within the past 12 months among households with a respondent.

##### **Percent HHs sprayed < 12 months (%)**

The percentage of households reported to have been sprayed within the past 12 months among households with a respondent. The denominator is the total number of households with a respondent.

##### **Average numbers months ago HH sprayed**

The average number of months ago the households were reported to have been sprayed among households with a respondent.

#### *Enumeration results: Household received IEC materials*

##### **Percent HHs receiving IRS brochure (%)**

The percentage of households reporting that an IRS brochure was received among households with a respondent. The denominator is the total number of households with a respondent.

##### **Percent HHs receiving ITN brochure (%)**

The percentage of households reporting that an ITN brochure was received among households with a respondent. The denominator is the total number of households with a respondent.

#### *Enumeration results: Community health worker (CHW) visits*

##### **CHW Visit**

Households reporting a CHW has ever visited their household

##### **Percent HHs reporting visits by CHW (%)**

The percentage of households reporting a CHW has ever visited their household. The denominator is the total number of households with a respondent.
